

Disease

Familial hyperaldosteronism, Type I^{1, 2}

Gene

CYP11B2

Inheritance	AD
Current Treatments	mineralocorticoid receptor antagonists and glucocorticoids
Evidence for Treatment	guideline ³
Non-Molecular Testing Availability	yes
Non-Molecular Test	potassium, aldosterone, renin levels ¹
Experimental / Investigational Therapies	https://clinicaltrials.gov/ct2/results?cond=Hyperaldosteronism&term=&cntry=&state=&city=&dist=
