

Disease

PSTPIP1 associated inflammatory disease^{1, 2, 3}

Gene

PSTPIP1

Inheritance	AD
Current Treatments	adalimumab and tacrolimus, NSAIDs, corticosteroids, Bone marrow transplant (hematopoietic stem cell transplantation (HSCT))
Evidence for Treatment	expert opinion
Non-Molecular Testing Availability	no
Experimental / Investigational Therapies	https://clinicaltrials.gov/ct2/results?cond=pstpip1&term=&cntry=&state=&city=&dist=
